## Change Impacts

Use our Change Impacts Assessment Toolkit (with multiple templates) to conduct both high-level and detailed assessments of project impacts.

Change Impacts Assessment is typically done for all projects. It's where you assess which groups or individuals are being impacted and will need change management engagement. You also assess their level of impact, so you know how much engagement they may need.

## Project Risk & Success Assessment

The OCM Solution Project Risk & Success Assessment Toolkit makes it simple to report on project risk at each project stage and target the areas that need attention. It's designed as a proactive tool to boost project success..

You also get a Checklist to walk you through learning about the project and its needs/goals. This is typically done for all projects as the change management team is ramping up and collecting details for the change engagement strategy.

# Resistance Management

Our Resistance/Opposition Management toolkit is equipped with structured proactive and reactive resistance mitigation plans that guide you through every step of your project. Effectively identify resistance, engage with resisting individuals, and remediate the different levels of resistance.

You typically do this as you are managing and assessing your stakeholders. For smaller groups, this can be combined with your readiness assessment.
